

X-PROTECT GRAPHITE CONCENTRATE

— boost your unit's engine life —

X-Protect Graphite Concentrate

Proactively Protect Your Engine

Keeping your fleet running smoothly is crucial for your business. X-Protect Graphite Concentrate is a low cost addition to your regular maintenance that will **increase unit engine life and avoid unwanted breakdowns**. Avoid high engine repairs and ensure optimum efficiency.

Prolongs Engine Life

X-Protect is formulated to provide outstanding engine performance and resilience to **TK486 trailer unit engines**. The lubricant provides durability even during harsh and extreme operating conditions.

To maximize protection of the engine's contact surfaces, it is recommended to **use X-Protect during the unit's lifetime**. The lubricant will not reverse existing corrosion.

Topping up with X-Protect

Topping up is simple. Add the content of the can to the engine sump and run for a few minutes to facilitate mixing.

Use a single 0.5 litre can of X-Protect Graphite Concentrate when the unit is first put into service and then with **every subsequent engine oil change.**

This 0.5 litre format is specifically designed for trailers with 12L oil capacity engines.

X-PROTECT

Every X-Protect unit is clearly identified with a special decal.

What is X-Protect Graphite Concentrate?

Refrigeration units, by their nature, endure extreme operating hours, long idle periods and continuous vibration. As a result, internal surfaces dry out leading to pitting corrosion on critical components.

Thermo King X-Protect engine liquid lubricant is designed to keep your trailer engine in excellent condition.

Graphite additives form a solid lubricant barrier between the engine's contact surfaces. The lubricant optimizes the engine's performance and it extends the life cycle of the engine.

CALL YOUR DEALER TODAY!

Thermo King – by Trane Technologies (NYSE: TT), a global climate innovator – is a worldwide leader in sustainable transport temperature control solutions. Thermo King has been providing transport temperature control solutions for a variety of applications, including trailers, truck bodies, buses, air, shipboard containers and railway cars since 1938.
