

Thermo King Fuel Filtration & Priming Kit

Thermo King offers a Fuel Filtration & Priming kit for your trailer unit that provides the best protection for the engine of your Thermo King unit and reduces downtime due to fuel-related issues.

Thermo King GreenTech Filtration Kit

All TK refrigeration units are equipped with the new range of GreenTech engines from Thermo King. These engines drastically reduce emissions, waste and noise pollution, exceeding all known requirements, including the most stringent EU standards.

When you see the GreenTech name and symbol, you know at a glance that you are looking at refrigeration units that contain the cleanest engines on the market today.

In line with our newest engines, we have developed a fuel filtration kit that provides additional protection of fuel injection parts and injection pump when running on current available diesel fuels on the market.

This kit contains a fuel filtration and priming device together with our EM13000 5micron fuel filter.

Pre-filter (30micron)

Fuel filter (5micron)

Key Advantages of Thermo King GreenTech Filtration Kit

Thermo King Fuel Filtration and Priming kit consists of a 2-step filtration solution, equipped with filters that are using high efficient filtration media that provide the highest retention of contaminating particles to get the best protection for your Thermo King refrigeration unit. Both items are designed based on Thermo King specifications and have been validated under extreme vibration and climate conditions.

- Fuel filters have patented water separator technology
- 5 micron version exclusively manufactured for Thermo King, offering the highest protection against water and particles for your Thermo King engine

Customer's Benefits

- Protection of the fuel injectors and injection pump
- Providing cleaner emissions
- Better fuel economy
- Longer component life
- Increased uptime and reduced service costs

Thermo King Fuel Filtration and Priming =
The ultimate solution in engine protection and unit uptime
