

Fuel Storage

Keep running for longer

The Thermo King fuel tank is an essential component of a total fuel management system.

When integrated with Thermo King’s fuel level sensors, fuel level displays and anti-siphon devices, it helps you manage and secure your fuel consumption and costs more efficiently.

Thermo King offers a 230 litre polyethylene tank for trailer applications. The impact and corrosion-resistant Polyethylene Fuel Tank with 230 litre capacity is safe, light and easy to install.

The high capacity ensures fewer fuel stops and increased uptime to keep you running for longer.

Start protecting your fuel investment today with the Thermo King anti-siphon device.
