

Polyethylene Fuel Tank

Keep running for longer

For any customer, keeping fuel costs down and staying within fuel capacities specific to different regions are today’s biggest challenges. Thermo King now offers a 90 litre Polyethylene Fuel Tank option that will cater for countries with two fuel taxes and those countries that have tight regulation on fuel volumes.

The Thermo King Polyethylene Fuel Tank is an essential component of a total fuel management system. When integrated with Thermo King’s fuel level sensors and optional lockable caps, it enables you to manage and secure your fuel consumption and costs more efficiently. The additional on-truck capacity provided by the Thermo King Polyethylene Fuel Tank cuts running costs and reduces the impact of fuel restrictions in your region.

The impact and corrosion-resistant fuel tank with 90 litre capacity is safe, light and easy to install.

Key Features

- Approved for diesel and bio-diesel (B7)
- Vibration resistant to Thermo King standards
- Lightweight and impact and corrosion-resistant polyethylene
- TUV approved
- Uniquely designed to reduce contaminants entering the fuel system
- Mechanical fuel gauge with option to upgrade to electric monitoring
- Galvanised steel drain plug as standard
- Option to upgrade to a lockable fuel cap
- Quick fuel line connections

DESCRIPTION	PART NO
Installation kit	900428
LED corner mount display	401032
Lockable cap	119629
