

## Service Kit

### Genuine parts guarantee maximum uptime

Thermo King units must operate dependably in extreme and challenging environments and so regular scheduled service is essential. This service will only be effective if it is performed by qualified technicians. Genuine parts should always be used to ensure unit integrity and maximize the lifespan of major components. Thermo King has developed a range of fully featured Service Kits comprising all the parts needed to service a specific unit model. Use of a Service Kit minimizes time spent on diagnosis and sourcing parts as well as delays if parts needed are not in stock. The content of each kit varies according to the unit model and its service interval. Kits typically include filters, belts, driers and gaskets.

#### Key Features

- Includes all the maintenance parts required to perform a scheduled service.
- Readily available and delivered in one box, under one reference number.
- Priced lower than the sum of the individual items.
- Typical contents:
  - Service B: Filters (fuel ,oil, air)
  - Service C: Filters (fuel ,oil, air), belts, driers, gaskets and hardware.
